Chinese Premier to Submit New Cabinet

PEKIN, July 21.—President Yuan Shai Kai today informed the delegation representing all parties, which recently was appointed to discuss the cabinet situation with him, that the premier, Lu Cheng Hsiang, the only minister left in office, had consented to submit a new cabinet list.

The president expressed the hope that the cabinet assembly, which two days ago voted all his proposals for a cabinet portfolio, would recognize that the policy of obstruction was impolitic and would delay designation of the republic abroad.

The cabinet assembly, which has under consideration the bill relating to the constitution, today adopted a resolution settling the composition of the senate. Whether Mongolians and Tibetans shall sit in the house of representatives is now being debated.

PRINCE KATSURA TO LEAVE RUSSIA SOON

ST. PETERSBURG, July 21.—The serious illness of the Japanese ambassador has decided Prince Katsura to terminate as speedily as possible his visit to Russia. The prince and his party will leave here for Japan July 27.

Start a Subscription List for Wilson's Campaign Fund

SEA GIRT, N. J., July 21.—Governor Wilson's eschewed politics today and remained in seclusion all day at the home of a friend, not far away. He slept 20 hours and expected to retire early again tonight. He was thoroughly tired, he said, from the activities of the week and did not intend to return to Sea Girt until tomorrow when he will see Senator Reed of Missouri, a member of the national campaign committee.

It will be the first time Governor Wilson will have seen Senator Reed since the personnel of the committee was announced. Representative Henry of Texas, probably will accompany Senator Reed.

A telegram today from Colonel Robert L. Ewing, national committee man from Louisiana, and a member of the campaign committee, announced that he had again started a public subscription list for the campaign fund through the columns of his newspaper. Several other publishers including Norman B. Mack of Buffalo also have sent word of the opening of similar subscriptions.

One of the matters the campaign committee has in mind is the opening of "dollar subscription lists" throughout the country.

Edward E. Grosscup, chairman of the Democratic committee of New Jersey, announced today that he was planning a rally day at Sea Girt early in August for all the Democratic clubs in New Jersey. Mr. Grosscup hopes to have a New Jersey Democrat on every yard of the rifle range which extends 1,200 yards in front of the governor's cottage to the ocean, and is half a mile wide.

Letters From Republicans

From more than 2,000 letters of prominent Republicans which Governor

Wilson has received assuring him that the writers would vote the Democratic ticket this year, not to mention uncounted letters from more obscure members of the Republican rank and file, there were made public tonight the contents of 100 or more which the governor has answered personally.

In no case was the name of the writer given for publication but the original of each letter is on file at the governor's office. A large proportion, perhaps 25 per cent of the nominees' correspondence, is composed of these unsolicited pledges of support by Republicans.

"I have always been a Republican and never voted for any other party," wrote the president of a college in Pennsylvania. "But I so thoroughly believe in you that I intend to give you my vote and my influence. Depend on me for any services I may be able to render."

The president of a Brooklyn bank wrote:

"Your candidacy appeals to the whole country."

This came from a president of a national bank in Maine.

"Together with many former Republicans, among the most representative men of our good state, I shall support you."

From the head of a trust company in Chicago:

"I shall be happy to aid you in any way within my power."

A leading Republican lawyer of North Dakota:

"You may count on the support, not only of the Democratic party, in this state, but of a very large Progressive Republican vote. Pray feel at liberty to call upon me at any time to assist you."

CAMPBELL PROBABLY WILL TAKE I. W. W.'S

CRIPPLES CREEK, July 21.—If Thomas Campbell of Butte, Mont., is expelled from the Western Federation of Miners, he will take with him all the members of the Industrial Workers of the World faction, was the generally expressed belief of delegates to the twentieth annual convention of the federation, today. Tomorrow the convention will continue its executive hearing of the fight between Campbell and President Charles Moyer.

While members refuse to commit themselves, the sentiment seems to be in favor of Moyer. The split in the federation may have momentous results. If the I. W. W. members withdraw, it is thought they will form a rival organization to the federation.

The action now being considered by the federation was brought to a head after years of effort on the part of Moyer to remove the revolutionary faction.

Campbell charges that Moyer and other officers of the federation are not working in the interests of the organization. Counter charges of a similar nature are made by Moyer.

Tells of Raid on the Dardanelles

ROME, July 21.—Admiral Viale, in a wireless report on the raid of the Dardanelles by Italian warships, says: "On the night of July 18-19, the torpedo boats Spica, Centauro, Astore, Cilmenio and Perseo crept unseen through the opening to the Dardanelles, but were discovered before they had progressed far inside. A volley of searchlights flashed on the torpedo boats and the Turkish forts opened a hot fire. The flotilla, however, continued to steam on at the rate of 21 knots in close formation, hugging the European shore. When they reached Killid Bahr, the Spica which was leading, ran into a steel cable. She disengaged herself, but soon ran into another maze of cables.

"The searchlights then became so dazzling that it was impossible to steer any course and Commandant Mulo decided to retire. This was effected in perfect order. The torpedo boats suffered only slight damage."

CALIFORNIA
For Insants and Adults
The Kind You Have Always Bought
Original Bottling

Iron and Steel

NEW YORK, July 21.—Consumers of finished steel products are daily pressing the mills for delivery on contracts, and in some instances, where shipments are not forthcoming, are purchasing elsewhere at \$1 to \$2 per ton premium for prompt fillings. Under such circumstances the steel companies have small concern because business has increased in volume. The shrinkage of orders is less than equal in July, and railroad equipment buying is again rising.

Last week's railroad contracts will call on the mills for 230,000 tons more steel. The Canadian Northern railroad placed another contract for 20,000 tons of rails with the Dominion company, while home railroads ordered 30,000 tons in small lots. The car contracts aggregated more than 15,000 cars.

Locomotive orders included 22 for the Maine Central, 20 for the Illinois Central, 58 for the Erie, 46 for the St. Paul, 60 for the New York Central, 37 for the Pennsylvania railroad, 10 for the Big Four, and 11 miscellaneous. Contracts for fabricated structural steel were about 20,000 tons.

Dr. Yamina Sen of China is said to be the first woman admitted to the fellowship of the royal faculty of physicians and surgeons at Glasgow.

OFFICERS CAPTURE \$5,000 LOT OPIUM

Shower Bullets on Smugglers Who Stop Only After One Is Badly Wounded

SAN FRANCISCO, July 21.—Customs inspectors captured a \$5,000 lot of contraband opium from the Pacific Mail liner Korea, late last night, after a rain of bullets from the officers' revolvers had brought the smugglers' Charles May, ship's carpenter, and Otto Langfette, a waiter, to a halt. The men were rowing away from the steamer in the dark and did not stop until a bullet smashed Langfette's hand. May leaped overboard and was picked up more dead than alive from water he had swallowed.

Inspectors Enlow and Hoard had received a tip that the attempt to land the drug would be made last night. They hid aboard a schooner tied up on the offshore side of the liner. As the smugglers dropped from the Korea into their boat and pulled away, Enlow called to them to halt. The men rowed frantically for the shelter of the dock, but a bullet struck Langfette's hand and he dropped his oar. The inspectors lowered one of the schooner's boats and, after May had been picked up, found the tins of opium in the rowboat and in the water alongside.

In connection with the repeated daring efforts to land opium from Pacific mail steamers, United States District Attorney McNab said today that the government would call upon the officials and ship's officers of the Pacific Mail company to aid in stopping the traffic. On this ground, he moved Saturday for a continuance of the case of Capt. Henry Zeeder, before United States Commissioner Brown. Zeeder, commander of one of the Pacific Mail fleet, is under investigation through the law which holds steamship captains responsible for contraband articles found aboard their ships.

McNab said he desired to continue all Pacific Mail smuggling cases until the return to this city of J. P. Schwerin, vice president and general manager.

ARREST TWO

(Continued From Page One.)

man who can throw more light on Becker's participation in the case. Whether he has gone is a matter of conjecture, but Commissioner Dougherty admitted that Sullivan had told him that he left Lieutenant Becker's automobile in the vicinity of Broadway and Forty-second street an hour and a half before the assassination on Tuesday morning. Sullivan was also in "Bridge" Webber's place. Whether the other men who are implicated were in Webber's the commissioner refused to say.

Sullivan is said to have admitted that he was with "Bald Jack" Rose on Monday, in San Paul's place. Rose is now locked up in the Tombs, charged with complicity in the murder. After leaving Rose, Sullivan went to the fight in Madison Square Garden, and at the conclusion of the bout, joined Lieutenant Becker and was driven away from the garden in the latter's machine. It is claimed that Sullivan was in the immediate vicinity of the murder at the time it was committed.

HIGH OFFICIALS OF DEPT. CEASE DEFENSE OF BECKER

NEW YORK, July 21.—Deputy Police Commissioner Dougherty, active head of the police hunt for the murderers of Herman Rosenthal, the gambler, was busy today making mysterious visits about the city in his efforts to bring about the sensational developments which he had indicated were impending.

Developments were looked for late tonight, but in the early evening nothing could be learned as to what had resulted from the commissioner's activity. High officials of the police department have ceased their defense of Lieutenant Becker, formerly head of the "strong-arm squad," and accused by Rosenthal of having been in partnership with him in a gambling business. Deputy Commissioner Dougherty indicated this when, in reply to a question as to whether Becker had been sent to Far Rockaway to bring in "Bald Jack" Rose, Wednesday night, replied:

"I would no more send out Becker to arrest a man in connection with the Rosenthal murder than I would send out Jack Rose himself."

That Dougherty believes Rose is an important figure in the case is admitted by the commissioner. Mr. Dougherty has implied in a statement that he does not believe the assertion of Rose that he was not in control of the "murder car" at the time Rosenthal was shot down. Rose is a friend of Becker, and is said to have been working for Becker the night before the murder.

Another witness of the assassination was found early today. He is a newsboy, who sold Rosenthal a batch of morning papers just before the gambler was shot, in front of the Metropolitan hotel. The newsboy tells a vivid story of the murder, and as yet is believed to have given little information of importance bearing upon it.

Financial Review

NEW YORK, July 21.—With the banking position reinforced, and with good news of the progress of the grain crops, speculative sentiment in the stock market last week became hopeful, and a sustained uplift of prices resulted.

The bank statement at the end of the preceding week had disclosed a restoration of the surplus reserves over the legal requirements, and there was no further pressure last week on borrowers such as was reported the previous week in following-out measures to correct the deficit.

Successive low records for British consols was established in the London market under pressure of liquidation

"Ask anyone who has made it."

A NATIONAL HEALTH DEPARTMENT

THE health planks of the Democratic and Republican platforms are as follows:

DEMOCRATIC HEALTH PLANK.

We reaffirm our previous declarations advocating the union and strengthening of the various governmental agencies relating to pure foods, quarantine, vital statistics, and human health. Thus united and administered without partiality or discrimination against any school of medicine or system of healing, they would constitute a single health service, not subordinated to any commercial or financial interests, but devoted exclusively to the conservation of human life and efficiency. Moreover, this health service should cooperate with the health agencies of our various states and cities without interference with their prerogatives, or with the freedom of individuals to employ such medical or hygienic aid as they may see fit.

REPUBLICAN HEALTH PLANK.

It will strive not only in the nation, but in the several states, to enact the necessary legislation to safeguard the public health; to limit, effectively the labor of women and children; to protect wage-earners engaged in dangerous occupations; to enact comprehensive and generous workmen's compensation laws in place of the present wasteful and unjust system of employers' liability; and in all possible ways to satisfy the just demand of the people for the study and solution of the complex and constantly changing problems of social welfare.

Of these two planks the Democratic statement is the stronger and more definite. It pledges the party to the "union and strengthening of the various governmental agencies" into "a single health service." Consequently the Democratic party promises to support the Owen bill, or a similar bill, to create a National Health Service.

The Republicans state that they "will strive to enact the necessary legislation to safeguard the public health." Hence it is left to each individual to determine whether the establishment of a Department of Health would be beneficial to or militate against the public health. Nicholas Murray Butler has succeeded in making this plank, like others, as vague as may be.

A Department of Health should be established. In addition the Food and Drugs Laws Needed. Act should be amended to make the law more effective.

At present manufacturers are permitted to label any concoction a "cure" for any disease, acute or chronic, curable or not, if that concoction does not contain ingredients prohibited by the Act.

The Owen bill has recently secured new adherents, or renewal of support. The General Federation of Women's Clubs has gone on record as continuing its loyal and enthusiastic support of the movement; the American Institute of Homeopathy has voted to endorse the principles of the Owen bill; Mrs. Steison of the Christian Science Church has refused certain members of that church for allying themselves with the champions of medical freedom who oppose sanitary legislation.

Both Republicans and Democrats should unite in furthering health legislation. The establishment of a single Department of Health is the next step forward.

RAILWAY WAGES AND THE COST OF LIVING

THE "Bureau of Railway Economics" is maintained at Washington, D. C., by the railways of the United States "for the scientific study of transportation problems." This bureau has just published a bulletin entitled, "A Comparative Study of Railway Wages and the Cost of Living in the United States, the United Kingdom and the Principal Countries of Continental Europe."

The study was made under the direction of well-known and competent investigators; it is based upon the most reliable data. Consequently, the following conclusion quoted from it is well worth our confidence:

"The average daily compensation of railway employees of all classes for the year 1910 was in the United States \$2.33; in the United Kingdom, \$1.05; excluding supplementary allowances negligibly affect-

ing the average; it was in Prussia-Hesse 81 cents, and in Austria 89 cents.

"The quantity of food and fuel estimated by the Board of Trade of England as the standard consumption of a typical workman's family costs in the United States 17.8 per cent more than in France or in Germany; 35.3 per cent more than in Belgium, and 38 per cent more than in the United Kingdom.

"It is well within the truth to estimate in a broad and general way that while the cost of living of a railway employe in the United States is less than fifty per cent higher than that of a corresponding employe in the United Kingdom or on the Continent, his compensation averages over twice as great."

A comparison of the average wages of railway employes in the United States, excluding compensation to general and other officers and clerks, as given by the Interstate Commerce Commission for the last 11 years, with index numbers showing the annual level of prices, as given by the United States Bureau of Labor, indicates this conclusion:

The purchasing power of the average wages of railway employes has shown no steady tendency to increase or to decrease during the period 1900-1910. Since as prices go up the purchasing power of a dollar goes down, average wages (given in the first column below) are divided by index numbers of wholesale prices (given in the second column) in order to get "purchasing power" (given in the third column):

Year	Average Wages of R. R. Employes	Wholesale Prices (Relative)	Purchasing Power (Relative)
1900	\$1.55	110.5	139
1901	1.54	108.5	141
1902	1.56	112.9	138
1903	1.93	113.6	170
1904	2.00	113.0	177
1905	2.01	115.9	173
1906	2.02	123.5	163
1907	2.14	128.5	166
1908	2.19	129.8	171
1909	2.17	126.5	171
1910	2.23	131.6	169

In order to determine the relative purchasing power of a dollar of workman's wages it would be, of course, better to base the computation upon prices of those goods that workmen consume rather than upon wholesale prices. In the absence of data on retail prices it is necessary to take wholesale prices in the above comparison. It is safe to say, however, that during the 11-year period covered, average wages and the cost of living moved upward at approximately the same rate.

EXTENDING THE SUFFRAGE—AND ENFORCING IT.

From the Kansas City Times.

When voting is recognized in the law as a duty as well as a right there will be no objection to letting everyone vote—women as well as men.

Voting ought to be compulsory. Jury service is enforced. So are working the roads, serving in the army in time of need, paying taxes, etc. Or the failure to render such public service is penalized.

There is no higher public service than casting a ballot. The repeater is not the only one who offends against that service. The citizen who shirks the obligation—the civilian deserter—is an almost equal offender.

One central place of voting—logically, the city hall—should be the prescribed place of voting. It is easily accessible, and could be authorized as there are substations of the postoffice. With two weeks, instead of the arbitrary one day set apart for an election, everybody could vote with less inconvenience than now. And few, if any, would be involuntarily disfranchised as many are now, by sickness or absence from the city on election day.

Responsible, competent officers directing the discharge of this duty of voting would give the right of voting a dignity and a security from fraud which is unattainable now when it is treated as a sport of politicians.

Manifestly, the extension of suffrage to those who would not use it is of nothing like the importance that the exercise of the right by those who have it is. If woman suffrage is coming the need of compulsory voting becomes doubly imperative.

PREVENTING TUBERCULOSIS.

From the Washington Evening Star.

It is highly encouraging to hear from those who are addressing the sessions of the National Association for the Study and Prevention of Tuberculosis, now in session here, that the disease is decreasing. Sanitarians and insurance statisticians agree that there is less prevalence of this affliction now than in years past, and the hope is rising that ultimately the white plague will be conquered. Certainly more is known of tuberculosis now than ever before, and it is rated as a preventable and a possibly curable disease. The causes have been traced and the circumstances of its spread are being widely exploited, so that the truth is reaching even the most ignorant.

These results have been accomplished by dint of effective organization and persistent publicity. The newspapers of the country have done a most valuable work in constantly setting before their millions of readers the truth about tuberculosis, combating the old notion of its strictly hereditary and unpreventable character, pointing out the dangers of carelessness on the part of sufferers from the disease, showing how the risk can be lessened by the observance of sanitary laws, preaching the doctrine of fresh air and good food, and releasing humanity from the thrall of an inevitable enemy that could not be any possibility be resisted.

The organization now in session in Washington is the highest American expression of faith in the possibility of modern medicine and sanitation to conquer this disease, that has taken countless numbers of victims in the course of time. It compels those who are most active in the warfare, and its proceedings are of the utmost importance to the public health of the country. No matter how large a percentage of deaths may be caused still by tuberculosis, the fact that it is known to be falling is a virtual proof that the fight is being won. It will not require much longer to bring the dis-

ease under restraint. Some legislation is necessary to insure the proper treatment of tuberculosis cases. There may be need in some localities of laws for the segregation of sufferers under certain circumstances, perhaps with state aid for the support of those dependent upon them, and with searching scrutiny of living conditions to lessen the danger of exposing the well to the unhealthy influence of the sick. Funds are to be raised in every community for insuring open-air treatment in cases where there is the possibility of cure in the early stages of the disease. Above all, the work of education must proceed unrelentingly to bring each person, young and old, to realize the urgent need of care in the explicit obedience of certain sanitary laws, and to carry knowledge of the true nature of the disease to everybody.

There need be no sense of discouragement because tuberculosis still prevails, and takes many thousands of lives annually so long as there is assurance of a gain and plain evidence that the improvement is due not merely to corrective measures adopted by public authorities, but to a clearer understanding of the contagious character and the preventability of this ailment on the part of the people.

ALCOHOLISM AND PHYSICAL DEGENERACY.

From the Philadelphia Inquirer.

In his address before the American Medical Society at Atlantic City the other day, Dr. Alexander MacNicol, declared that the American people were degenerating physically, and that the use of alcohol was the cause of it. Perhaps the degeneration which the statistics indicate is more apparent than real. It is only of recent years that information upon this subject has been scientifically and comprehensively collected and the inferences drawn from current reports may be misleading. However that may be, Dr. MacNicol was certainly wrong in his explanation of the evils which he deplored.

Alcohol may or may not injuriously affect the health of those who use it. That is a question upon which opinions differ, and with regard to which the evidence is conflicting. Sometimes it does and other times it apparently does not. Always assuming that there is no excess, it depends on the individual. But that the children of alcohol-using parents are prejudiced by that circumstance there is no reason for believing. Dr. MacNicol made the statement that since the beginning of the century 1,000,000 babies had died as the result of the drink habit of their parents. This does not agree with the conclusions reached by the Fringis Dalton Laboratory of Eugenics, by which this subject was lately investigated. It examined more than 3,000 children, about one-half of whom had parents who used alcohol to excess. Its report was "that the children of alcoholics showed no appreciable inferiority to the children of sober parents in physical development, intellectual growth or sense perception."

Further than that, it found that the average weight and height of children in the alcoholic section were somewhat the greatest and their susceptibility to tuberculosis and epilepsy less. Upon the whole, the investigation, which was conducted with absolute impartiality, failed to discover any relation whatever between drunkenness in parents and the health of their offspring. So far as the United States is concerned, everyone knows that the cause of degeneracy is in the environment. There is very much less drinking of strong liquor than there was in those early days of the republic, which some are inclined to regard as the age of innocence. If this generation has deteriorated, the circumstance must be due to some other cause or causes than the one Dr. MacNicol assigned.

DOUBLE BLANK IN SPEEDWAYS.

Miss Lillian Mallon of 301 North Euclid avenue was fined \$50 and costs for speeding in the new automobile court.

HE SHOULD, WE DEDUCE, KNOW SOMETHING ABOUT A MOLDING STICKER.

From the Daily News.

Molding sticker man wanted—To run molding sticker, Oak Park.

SOCIETY NOTE.

From the Los Angeles Times.

Mrs. Jennie White, proprietor of a restaurant at Kelso, his Justice of the Peace Holz over the head with a piece of timber Thursday when he refused to stop fighting in her place.

On Favorite Words

By RUTH CAMERON.

Some time ago I wrote a little talk about the words in the English language which I particularly loved. When I had written this I hesitated about publishing it after all because I was afraid that there would hardly be enough interest in it to the average reader. How much I was mistaken has been proved by the large number of letters which have come to me expressing interest in this subject, and telling me of the great value of the words. To make a full list of all these would not be possible, but the interest in this subject seems to have spread so that I have made a partial list. It is difficult to tell sometimes whether it is the sound or the meaning of a word which makes it beloved. Evidently the contributors to this list were influenced by both considerations.

The word "home" most emphatically heads the list. If this were a voting contest, "home" would certainly be elected the most beloved word in the English language. Needless to say, "mother" was a close second. (The reader perceptibly called attention to the word "mother" and its untranslatable and tedious substitutes "mammy" and "ma.") Other words which were favorites with a good many people were:

Twilight—makes me think of soft music; one woman wrote: "I wish she could attend the 'twilight hour' at Vassar college chapel."

Violin—A great favorite. Love. Strength. Morning. Peace.

Slumber—I wish I had included this in my own list. It is so truly a wedding of sound and sense.

Perhaps you will find some of your own favorites among this list of the "also rans."

Love—I love this because it sounds so musical that the very sound of the word would suggest music to a foreigner.

Azure—Holy. Glorious. Eternal. Melodious. Shepherd. Winome. Tender. Gloaming—because there is something restful not only in the meaning, but also in the very sound.

Iridescent. Fragrant. Content. Wholesome. Topaze. Hilo. "Adonice" reminds me of the sound made by the autumn wind.

Courageous—not because I consider it musical but because of the suggestion of moral strength.

Silent—"Silent upon a peak in Darien."

Sylvan—there is no denying, but this does sound like the tapping of the leaves on the trees on a starry night in summer.

RULE CORRECT TO 200 THOUSANDTH OF INCH

Apparatus Used by Government to Get an Absolutely Perfect Measurement.

What is a yard, a foot, an inch? What is a pound, an ounce, a pennyweight? What is a quart, a pint, a gill? We all know approximately what these are, but to be absolutely precise, as is sometimes necessary, the most elaborate calculations have been and are still being made. Absolute standards of length and weight are necessary, says the Milwaukee Sentinel. A measure a foot long varies with the temperature, longer in hot weather, shorter in cold; a piece of metal weighing exactly a pound at New York weighs less than a pound at Caracas and more than a pound at Hammerfest. These things depend upon gravitation, which differs at different points of the earth's surface. Therefore, it is necessary to measure the force of gravity all over the world. In the United States alone there are 17,000 variations about two-thirds of which have been occupied during the last three years.

In 1655, Sir Isaac Newton discovered the law of universal gravitation; that the attraction between two bodies is directly proportional to their masses, and inversely proportional to the square of the distance between them. In 1672, Richter discovered the variation in the force of gravity at different places. He took a clock from Paris to Cayenne and found that in the latter place it lost two seconds every day, whereas it kept perfect time in the former city. This led to the use of the pendulum in calculating the force of gravity.

Measuring gravity involves perfect apparatus, for the margin of probable error must not be greater than one part in 200,000, corresponding to an error of only one-millionth of a second in the period of oscillation of the pendulum.

C. H. Swick of the coast and geodetic survey, Washington, describes in a recent Bulletin of the American Geographical Society the delicate apparatus now in use. This consists of three pendulums, an airtight brass case in which the pendulums are swung, a telescope for observing their oscillations, two chronometers, an astronomical transit, a chronograph, several thermometers, a micrometer and an interferometer; this last for measuring the movement of the case caused by the swing of the pendulum. The pendulum is a simple stem and bob of brass; it has attached to its head a small acute plane which rests upon an agate knife edge in the case. The air in the case is exhausted to less than one-tenth of atmospheric pressure, and the pendulum will swing continuously for more than eight hours, even though its initial arc is only about one-fifth of an inch.

The oscillations are observed and compared with the beat of the chronometers at the beginning, middle and end of each eight-hour swing, and from these comparisons the average period of oscillation is computed. The observations extend over 48 hours, each pendulum being used in turn. Before and after each swinging the chronometers are corrected to the nearest hundredth of a second by star observations with the transit.

But the gentle swinging of the pendulum makes the case move—over so slightly, it is true, but sufficiently to retard the oscillation of the pendulum. So it is necessary to measure this almost imperceptible movement, and to allow for it in the computation. This is what the interferometer is for. It is a delicate instrument which depends in principle upon the interference of light waves. With it, says Mr. Swick, distances as small as one-thirtieth-millionth of an inch can be measured. It records vibrations of the ground due to the passing of a train or horses a block away or a train a mile away. Therefore observations are usually possible only at night when everything is quiet. At least twice a year the instruments are taken to Washington and tested. The base station is at Washington where the periods of oscillation of the pendulum are known exactly. They were ascertained several years ago by using Potsdam, Germany, as the base station, where the force of gravity was known from absolute determinations covering many years.

All these elaborate tests make it possible for anyone to get a measure of length or weight absolutely accurate at any given point—that is, accurate to the 200,000th part of an inch.

Knowledge of the exact strength of the force of gravity gives a basis for many calculations, such as the thickness of the earth's crust and corrections of measurements of the moon's distance from the earth.

TAPIOCA AND ALCOHOL

From Harper's Weekly.

The manioc plant, from which cassava, tapioca and arrowroot are obtained, has been cultivated in the parts of Africa, Madagascar and India, and the East Indian islands. It grows readily in all tropical countries and yields abundant supplies of starch. The most valuable species, the "bitter manioc," is a poisonous plant. The starch is contained in the thick, milky juice of the root, which with a violent poison of the oil-of-bitter-almonds kind. The natives dry the juice and then roast the paste on iron plates. As a result of this treatment the poison is driven off and the masses of starch roll up into little balls; these constitute the "chips" of commerce. When the starch masses are ground and mixed into a coarse flour the product is known as "cassava." Another preparation of the starch of this plant is sold under the name of "Brazilian arrowroot." The South American Indians of certain tribes prepare an alcoholic liquor from the juice of this plant, called "payari." It is believed that the characteristic "pot-bellies" of the Caribs result from excessive consumption of this liquor.

French scientists have been experimenting with manioc starch with a view to its availability as a source of alcohol. As the plant is easily cultivated, and is remarkably resistant to the attacks of insects and fungi, its production on a large scale through the cheap labor of the tropical colonies should be feasible. The yield of alcohol from dry cassava is very high.

The Dutch have appropriated \$15,000 for building a railway across the island of Sumatra. For the building it will be bought from Java, and the work is to be completed in six years.

100 more Arts and Crafts Sterling Silver Beauty Pins go on sale this week at \$1.00 each.

HARDY'S
 16 N. Tejon

IN THE EARLY DAYS

TWENTY YEARS AGO TODAY

JULY 22, 1892.

The Santa Fe announced a rate of \$12 for the round trip from Chicago to Denver, on account of the Knights Templar convolve. The other roads were said to be thrown into consternation by this startling rate.

THIRTY YEARS AGO TODAY

JULY 22, 1882.

Burglars were operating in the community. A trunk was stolen from a box on North Cascade avenue, and money and jewelry from a boarding house on South Nevada.

The outside walls of the new county jail, on South Cascade avenue, had been completed and the iron roof trusses were being put in place.

The Prospect Lake company announced that fishing was permitted in

the lake either from the shore or from boats. A charge of 25 cents a pound was made for all fish caught. It was said that trout as large as a pound and a half had been caught recently.

Lieutenant Glassford, signal service, U. S. A., was in the city on business connected with the station on Plikes Peak.

The First Regiment Cavalry band of this city received new uniforms.

A heavy rain storm visited this city and the whole southern part of the state. A washout between here and Pueblo tied up the D. & R.-G. railroad traffic completely.

THE HASKIN LETTER

AMERICA'S GREAT ENDOWMENTS

XIII—THE PROPOSED ROCKEFELLER FOUNDATION

By FREDERIC J. HASKIN.

If congress decides to incorporate the proposed Rockefeller foundation, it will represent the greatest single endowment in the history of the world. That it will be incorporated seems probable, since practically every objection that was urged against the original bill has been met in the new one, and it now stands on one of the house calendars with a favorable report behind it, and awaiting only the time when the house can get around to it.

It is proposed by Mr. Rockefeller that the funds of the foundation shall not exceed \$100,000,000 at any one time. Of course, the total funds, which may have been exceeded, that it shall not hold more than that amount, at any one time. The foundation may find places to use the principal in some measure, and the terms would allow this to be made up again. The \$100,000,000 limit was set because some members of congress thought it would be dangerous not to do so.

The objects of the proposed foundation are broad and calculated to promote the well-being of the human race. The objects of the Smithsonian Institution were stated broadly to be for "the increase and diffusion of knowledge among men;" those of the Rockefeller Foundation are for "the acquisition and dissemination of knowledge; the prevention and relief of suffering; the promotion by eleemosynary and philanthropic means of any and all the elements of human progress." No charter ever drawn up has been more careful to safeguard the rights of the government than that of the proposed foundation. The methods by which the work of the foundation are to be done are limited to eleemosynary and philanthropic means, and congress is to retain the right at any time to place whatever limitations it may see fit upon the foundation. Furthermore, the charter is subject to alteration, amendment, or repeal, at the pleasure of congress.

Powers of Trustees Broad.

The powers of the trustees of the foundation, subject to the wishes of congress, are very broad. The corporation may establish, maintain and endow institutions and other agencies for carrying out the objects of the foundation, or aid others to do so, whether individuals, associations or corporations. There are the usual provisions as to the holding of real estate and the erection of buildings. The corporation may collect statistics and information, publish and distribute books, etc.

The membership of the corporation is to consist of not less than ninety more than 25 members, with a three-year term of service, a third of the members being elected each year. The members in the future are to be elected by those in office, subject to the veto power of an electoral board made up of the president of the United States, the chief justice of the supreme court of the United States, the president of the senate, the speaker of the house, and the presidents of Harvard, Yale, Columbia and Chicago universities, a majority vote preventing any person from exercising the prerogatives of a member of the corporation. The principal officers of the foundation, like those of the Carnegie Institution, the Smithsonian Institution, and the Carnegie foundation are to be located in Washington.

Mr. Rockefeller recognizes the question of how the foundation is to spend its money as a legitimate one, especially in the light of forebodings in some quarters, lest it might be seeking the protection of a federal charter for private rather than for public ends. The question is answered by pointing to the unequivocal language of the charter, which effectually dedicates it to charitable and humanitarian objects, and also to the concrete instances of the Rockefeller Foundation, the Carnegie Institution, and the Carnegie foundation are to be located in Washington.

Controlling Motives.

The controlling motives announced by Mr. Rockefeller in the establishment of this foundation were: To secure, during the visible future, the same careful philanthropic investment of his wealth after his death that has characterized his gifts in life; to have a charter broad enough that the funds may be used in accordance with the wisdom and needs of the future, and not hampered by restrictions imposed before those needs were realized; to make this gift directly to the whole American people, and forever subject to the control of their elected representatives.

The reasons of Mr. Rockefeller's objection to a state charter or a District of Columbia charter lie in the fact that he wishes the objects of the corporation defined and controlled in accordance with the best contemporary wisdom from generation to generation, as long as the foundation endures. He wishes the control thus exercised to represent the public opinion of the entire country, rather than that of any state or section, feeling that otherwise the philanthropic interests of a single state might be given precedence

GAZETTE 60C PER MONTH

CITY PLANNING OF THE ANCIENTS TO BE TOPIC

In his lecture in the city council chamber next Tuesday evening at 8 o'clock Professor Mitchell Carroll, Washington, D. C., general secretary of the Archaeological Institute of America, will point out the principal features of city planning in ancient times to show what contribution antiquity has to make to the great awakening of interest in the City Beautiful movement in all the cities of the United States and Canada. He will illustrate his lecture with numerous lantern slides showing ground plans and restorations of Rome, Athens, the Pyramids, Corinth, Ephesus, Pergamum, Selinus, Pompeii, Palmyra and other ancient cities which have been excavated in recent years. He will call attention to the plans on which these cities were laid out, the centers of public life, such as the Acropolis, the Agora, the Forum, the parks and playgrounds, the treatment of water fronts and the like. His lecture will indicate that archaeology far from being remote from modern life has lessons of intense interest to all devoted to the improvement of city conditions.

Dr. Carroll is a member of the committee of 100 appointed by the Washington chamber of commerce to prepare the national park commission's plans for the beautification of the national capital.

Sends False Telegram Announcing Death of Wife; She Asks Divorce

Ten days after they were married in Colorado Springs, March 18, 1911, Herbert E. Phinney threatened to strike his wife Lila W. Phinney, with a shoe, according to her complaint for divorce filed in the county court at Denver. She claims that three months later while they were in Trinidad, her husband choked her and then de-
serted her leaving a big hotel bill unpaid.

A few days later she asserts she received a bogus telegram, informing her that Phinney was dead. Finally, learning that he was alive she re-
turned to him on his promise to treat her better. She says they went to Denver, but that her husband again deserted her leaving her for the second time with a hotel bill to pay.

CROWDS FEAST AT BIG CLAMBAKE AT THE ZOO

By far the biggest crowd of the season thronged Zoo park yesterday afternoon for the ball game and the free clambake. The ball game was well attended and the bathing beach was popular, but the clambake was the hit of the day. At least 3,000 people were served with clam chowder at the Vienna Village. Steaming Greely potatoes added to the zest of the feast and the entire affair was voted a big success.

TELLS OF CONVERSION OF THE FIJI ISLANDERS

The story of the conversion to Christianity from a cannibalistic paganism which has slowly come about during the last 65 years in the Fiji islands was the theme of the talk by Dr. George H. Halford, Cowles at the men's mass meeting at the Y. M. C. A. yesterday afternoon. Dr. Cowles has done much of this work in the South Sea islands and has an intimate knowledge of the life and the natives themselves. The audience heard the tale of the slow winning over of a barbarous people, showing the great work necessary to make the simple statement that today most of the islanders are church members.

ATTRACT MUCH ATTENTION

The archaeological lectures at the summer school of Colorado college are attracting a great deal of attention among the people of Colorado Springs, and many are taking the courses offered. The lectures this morning will be of special interest. At 9 o'clock, Prof. T. H. Peckham will speak on the "Pine Islands and at 10 o'clock Dr. Phinney will lecture on "The Civic Center of the City of Rome." This talk will be illustrated with slides and reconstructions. At 11 o'clock Dr. Carroll will give an address on "The Sculptures of the Parthenon." He will devote special attention to the Elgin marbles, now in the British museum.

DECLARES SOCIALISM IS APPLIED CHRISTIANITY

In an address before the Socialists in Carpenters hall last night, J. H. Frank-
lin, speaking on "The Message of Socialism to the Church," said that two classes are interested in Socialism—the working people and those seeking a better social morality. He said that many reformers and church people are becoming interested in Socialism because they feel that at present Christianity has not a fair field, that the present day motto is "Every one for himself and the devil take the hindmost" and because Socialism offers a solution of the problem. He characterized Socialism as applied Christianity.

Deaths and Funerals

The funeral of Cleo Delaney, aged 8 years, daughter of Mr. and Mrs. Joseph Delaney, 335 East Las Vegas street, who died Saturday morning, following an attack of scarlet fever, was held Saturday afternoon. Interment was in Evergreen cemetery.

The funeral of Mrs. W. T. Greville of 14 East Las Animas street will be held at 2:30 o'clock this afternoon, from the Second Congregational church. Interment will be in Evergreen cemetery.

COMMERCIAL LAW LEAGUE MEETS HERE THIS WEEK

With an estimated attendance of at least 100 from all parts of the United States and Canada, the Commercial Law League of America will meet at 8 o'clock this morning in the Auditorium hotel and will continue through Thursday. One special train from Chicago carrying 100, will arrive over the Rio Grande at 6 o'clock this afternoon. Two hundred and thirty-eight tickets in the convention here have been sold in Chicago alone.

Arthur, Comforth, J. J. M. Hays and Hildreth Frost compose the local entertainment committee and have arranged for a number of social trips which the delegates will take during sessions.

The executive committee of the league meets tonight in preparation for the regular session of the convention tomorrow. Tomorrow's session will be taken up with the committee and at 9 o'clock in the evening the annual reception and all will be held at the Auditorium. Wednesday morning's session will be devoted to further reports of committees and to miscellaneous business. Section addresses will be given at that time. The annual banquet will be held on Wednesday evening and the convention will close Friday morning with the meeting of the officers.

Robert J. Thompson, a young man, a resident of Colorado Springs and now western manager and part owner of the credit association at New York city, is among the delegates who have already arrived. Mr. Thompson, whose headquarters are at Kansas City, is considered an authority on commercial law. His lecture on the high cost of living has attracted considerable attention.

INSTITUTE OPENS TODAY

More than 200 teachers are expected to be present at the annual teachers' institute of the Fifth normal district which convenes in the city school building today. The district embraces the counties of Elbert, Teller, Douglas and El Paso. An address will be given by Mrs. Rush of Denver, an ex-
-superintendent of a high school, also will speak. The sessions will continue for two weeks, ending Friday, August 2.

Milton J. Potter, for years, superintendent of schools at Pueblo, who recently was made superintendent of schools in St. Paul, Minn., will conduct the institute. Among the instructors are Elbert David, a primary methods, constitutive work, folk dances, E. F. Dwyer, superintendent Colorado city schools, American history, physiology, geography, Grace Ellen Sage, North Denver high school, arithmetic, civics, school sanitation, Dr. E. A. Cross, State Teachers college, American literature, reading, grammar, Harriet P. Little, Denver music, Richard Brenner, State Teachers college, and a closing lecture.

The social feature of the institute, the annual reception, will be held in the court house corridors Wednesday night.

Freight Traffic Men Meet Here Tomorrow

The Southwestern freight traffic committee, which meets regularly bi-monthly, meeting here tomorrow, Wednesday and Thursday, about 300 members of the committee will be here and the revision of freight schedules will occupy a great deal of their time.

NEWTON, KAN., COUPLE WED HERE BY REV. J. Y. EWART

Dr. Ralph H. Hertzler and Miss Mary E. Ingham, both of Newton, Kan., were married here yesterday afternoon at 2 o'clock at the home of the Rev. John A. Ewart by the pastor. Dr. Hertzler is a practicing physician and his bride is a younger sister of Mrs. Clifford P. Ewart, whose wedding took place at Newton, last month. Miss Jessie Ingham, another sister, and Miss Bernice L. Swartz of Newton were present at the wedding, as were the bridesmaids only.

The Hillsdale Improvement society meets at the Hillsdale church at 8 o'clock this evening.

The legislative assembly of the Y. M. C. A. recently organized at the Colorado Springs Y. M. C. A. building.

Semi-Annual Clearance

A backward season finds us heavily overloaded in all departments of our Summer Stock. Our policy is never to carry stock from one season to the next. So here is your great opportunity to buy new up-to-date Oxfords, Pumps and Slippers at Clearance Sale Cut Price.

We hope to sell every pair of Summer Shoes with in a few weeks and to the end have cut the prices to accomplish our desire.

For Women

On a sales table we have placed a pair of Oxfords at \$2.00 and \$2.50 Oxfords in this model \$1.48

On another table we have placed a pair of Oxfords and Pumps in velvet, such as the kind you want \$1.98

A pair of 2nd model patent toe and kid button and lace well sole Oxfords in the latest styles sell usually at \$7 and \$7.50 at \$2.35

A pair of the season's soft creations in Pumps and Oxfords, button and lace, tan black velvet suede and satin sell at \$1.00, now at \$2.85

Six pair of hand fitted Pumps and Oxfords, kid and leather styles. The most handsomely decorated on the market this year. Every pair at \$1.00 and \$1.50 kinds at \$3.15

Personal Mention

Mr. and Mrs. Homer W. Cash of Louisville, Ky., who have been here for several weeks, left for home yesterday morning.

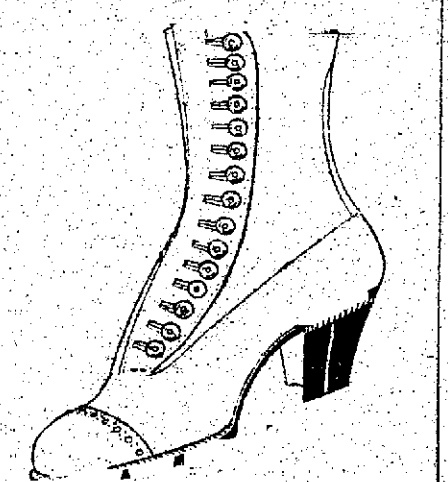

Edward M. Peters of Fort Worth, Tex., is at 801 North Corona street, during a visit to the Pikea Peak region.

Mrs. Mary J. H. Ely, who has been at the Ascomore, 501 North Corona street, since her return from San Diego, Cal., left for her ranch near Ratonville, yesterday, for a month's stay. She was accompanied by Ralph B. Plieger.

Mr. and Mrs. Walter M. Merrill and daughter, Gladys, of Grand Junction, are guests in the city. They stopped off on their way home from Denver, where they have been for the last two weeks. Mr. Merrill owns the largest job printing establishment between Pueblo and Salt Lake City, and is widely known on the western slope. They will be here several days to take in the sights.

Visitors, Attention!

Don't go home with a ruined complexion, with faded tan, and sunburn. Use Dry Climate Cream. It will undo all the bad work of the sun and the wind. You can get that at no other store.

F. L. Gutmann Remember We Sell No Liquors Telephone 311 and 312 Corner Tejon and Blou Prescription Druggist

Daily News

Dill pickles are now 20c a dozen. They are fine for pickles.

In order to close them out, we offer a few remaining bottles of Genesee Tomato Ketchup at 15c instead of 25c a bottle.

Be very careful of your meat this summer. Spoiled meat is poisonous. Our meat is kept in our great ice box cooled by a refrigerating machine of our own. We keep the temperature constantly near the freezing point. Meat can't spoil in there.
